

HTSL 2016 & 2018 TRACKER PILL HOLDER

The HTSL 2016 & 2018 packages known colloquially as the 'Tracker Pill Holder' are compact and lightweight Type A certified crawler command and location devices.

Utilising tungsten alloy shielding in both the torch and transport/storage case makes for an extremely portable package suitable for all modalities of transport and surface dose rates are well within international specifications.

Gamma ray control eliminates the need for complex electronic/radio technologies - such as Bluetooth or Magnetics, and thus allows for operation in the most extreme climates and hazardous areas, where intrinsic safety is essential.

The package is constructed using the very highest quality materials, the polypropylene copolymer case is IP rated and the torch body components and fixings are manufactured from stainless steel.

HTSL Tracker Pill Holder:

Part Nos:	2016	20mCi Cs-137
	2018	10mCi Co-60
